SPORT - HIGH PERFORMANCE

About Endurix

Cavalor Endurix is a sports muesli for horses that have to deliver performance. With puffed and extruded cereals that are easily digestible and provide a slower release of energy. With essential multivitamins that supply the higher levels needed for horses that have to deliver performance. B-complex vitamins play a key role in energy management.

Cavalor Endurix is a level 4 feed. Level 4 feed is for horses that perform at top sport levels. Horses that have to deliver performance, especially at high levels, can use some extra support. Cavalor Endurix gives competition horses that little bit extra, because it's the details that make the difference. Level 4 feeds cover the needs of horses that have to keep giving their all.

What makes Endurix unique?

Feed for horses that perform at top sport level.

With puffed and extruded cereals for easy digestion.
Flocked and extruded cereals are much easier to digest than unprocessed cereals and pellets. Extrudates are easily digestible and highly absorbable. Puffed and extruded cereals are processed, disentangling up to 90% of the starch. This makes the cereals twice as digestible compared to unprocessed cereals. Puffed cereals have many other benefits compared to unprocessed cereals, such as slower release of energy, fewer sugar peaks, lower risk of digestive problems like colic or gastric ulcers, more nutrients and energy in a smaller amount of feed, more flavour, longer gastric retention, and slower release in the small intestine

Sport essential multivitamins

Vitamins can help improve performance by giving a bit of a boost. Vitamin E protects muscle cells against free radicals and supports the natural functioning of the immune system. B-complex vitamins (thiamin, riboflavin, calcium D-pantothenate, pyridoxine hydrochloride, choline chloride, niacin, cyancobalamin, folic acid and biotin) play a key role in energy levels or contribute to improved metabolism of carbohydrates, nerve signals or the supply of oxygen to the muscles.

Advice

Feed as you need

The foundation of good nutrition for your horse is adequate roughage and access to fresh drinking water. Supplement this base with concentrates or a balancer depending on the individual nutritional needs of the horse. Use supplements to fine tune.

Feeding recommendations for Cavalor Endurix

We recommend a minimum of 600 g to maximum 800 g per 100 kg body weight per day. For a 600 kg horse this means a minimum of 3,6 kg and a maximum of 4,8 kg per day. Divide the concentrate feed over several portions per day, preferably after feeding roughage

Composition

Oats / Wheat middlings / Linseed husks / Puffed barley (6%) / Puffed wheat (6%) / Wheat bran / Puffed maize (5,5%) / Beet molasses / Soya oil / Toasted soya beans / Linseed / Spelt hulls / Broken oil seeds / Horse bean flakes / Maize / Soya bean hulls (produced from genetically modified soya) / Sunflower seed meal / Wheat / Alfalfa / Rape seed meal / Yeasts / Sodium chloride / Calcium carbonate / Fructo-oligosaccharides / Hydrated magnesium silicate

Nutritional value	Quantity
NE EWpa (CVB)	0.95 EWpa/kg
VREpa (CVB)	90 g/kg
DE (NRC)	12,33 MJ/kg
DE USA (NRC)	2.95 Mcal/kg

Analysis	Quantity
Crude protein	12.5%
Crude fat	7.5%
Crude ash	7%

Sugars	4.5%
Starch	26.5%
Calcium	0.8%
Magnesium	0.3%
Phosphorus	0.6%
Sodium	0.4%

Vitamins and trace elements	Quantity (addition per kg)
Vitamin A (3a672a)	10600 IU
Vitamin D3 (3a671)	1130 IU
Vitamin E (3a700)	350 mg
Vitamin B1 (3a821)	12 mg
Vitamin B2 (3a825i)	13 mg
Calcium D-pantothenate (3a841)	26 mg
Vitamin B6 (3a831)	2.4 mg
Vitamin B12	0.03 mg
Biotin (3a880)	0.2 mg
Choline chloride (3a890)	260 mg
Iron (3b103)	50 mg
Copper (3b405)	35 mg
Copper (3b409)	6 mg
Zinc (3b605)	93 mg
Zinc (3b609)	15 mg
Manganese (3b503)	110 mg
Manganese (3b506)	15 mg
lodine (3b202)	1.3 mg
Cobalt (3b304)	0.3 mg
Selenium (3b801)	0.24 mg
Selenium (3b815)	0.2 mg

Zootechnological additives	Quantity (addition per kg)
Saccharomyces cerevisiae CNCM 1-4407 (4b1702)	5,2x10^9CFU

Technological additives	Quantity (addition per kg)
Ammonium propionate (1k284)	378 mg
