

PRODUCT DATA SHEET

FIBERFORCE GASTRO

**High-fiber feed ideal for horses
with a sensitive stomach**

- › Acid balancer/buffer
- › Low sugar & starch
- › With soft fibers
- › High fiber

15 KG

SPECIAL CARE

About FiberForce Gastro

FiberForce Gastro is a high-fibre muesli for horses that have a sensitive stomach. It is high in fibre to promote saliva production and neutralise gastric acid. Horses that have stomach problems often lose their appetite because eating is painful.

Contains a mix of alfafa and teff pellets, beet pulp and 8% Timothy stalks that are gentle on the stomach lining. In addition, herbs protect the stomach lining from irritation and buffers help control acid levels in the stomach, maintaining an optimal pH. FiberForce Gastro is low in sugar (4%) and starch (6%). We added fenugreek to FiberForce Gastro, for extra flavour.

What makes FiberForce Gastro unique?

**Acid balancer/
buffer**

A horse's stomach produces gastric acid 24/7. The horse's stomach is very prone to developing minor wounds or ulcers. The buffers and herbal mix ensure a healthy environment in the stomach. Buffers neutralise excess gastric acid and help control its production, maintaining a neutral pH in the stomach. The herbal mix boosts saliva production and protects the stomach lining from irritation.

Low sugar & starch

Some horses benefit from a diet low in sugar and starch. This applies, for example, to horses that suffer from recurring gastrointestinal problems, like stomach ulcers, colic and diarrhoea. Horses with metabolic problems such as: insulin dysregulation, obesity, laminitis, EMS, and muscle diseases (PSSM, RER). A low-sugar, low-starch feed avoids high peaks in blood glucose and insulin level, so it can also be used for horses that are susceptible to e.g. stress and overweight.

With soft fibers

Horses with gastric ulcers have a sensitive stomach lining. Long fibres can irritate the stomach lining and cause the horse to stop eating. Timothy-grass fibres are gentle on the stomach lining, avoiding gastric irritation.

High fiber

High in fibre, also known as crude fibre. Crude fibre is an indispensable pacesetter for the intestines and allows for a gradual release of energy. Moreover, a mix of high-quality and easily digestible fibre results in improved digestion and avoids gastrointestinal problems. The more fibre the feed contains, the longer the horse has to chew, which also increases saliva production. The intestinal micro-organisms also need crude fibre. Getting enough fibre is an essential part of maintaining healthy microflora. A healthy gut results in a healthy immune system – a basic requirement for a fit and happy horse.

Advice

Feed as you need

The foundation of good nutrition for your horse is adequate roughage and access to fresh drinking water. Supplement this base with concentrates or a balancer depending on the individual nutritional needs of the horse. Use supplements to fine tune.

Feeding recommendations for

Cavalor FiberForce Gastro

We recommend a minimum of 500 g to maximum 1000 g per 100 kg body weight per day. For a 600 kg horse this means a minimum of 3 kg and a maximum of 6 kg per day. Divide the concentrate feed over several portions per day, preferably after feeding roughage.

Composition

Linseed husks / Alfalfa pellet / Sunflower seed meal / Timothy / Spelt hulls / Oat hulls / Soya oil / Teff pellets / Peas / Beet molasses / Maerl (2%) / Linseed / Dried beet pulp / Herbs / Monocalcium phosphate / Sodium chloride / Wheat / Coconut fat / Fenugreek / Calcium carbonate / Fructo-oligosaccharides

Nutritional value	Quantity
NE EW _{pa} (CVB)	0.57 Wpa/kg
VRE _{pa} (CVB)	69 g/kg
DE (NRC)	8.03 MJ/kg
DE USA (NRC)	1.92 Mcal/kg

Analysis	Quantity	Vitamins and trace elements	Quantity (addition per kg)
Crude protein	12%	Vitamine A (3a672a)	15300 IU
Crude fat	7%	Vitamine D3 (3a671)	1530 IU
Crude ash	10.5%	Vitamine E (3a700)	280 mg
Crude fibre	25%	Biotine (3a880)	0.102 mg
Sugars	4%	Choline chloride (3a890)	94 mg
Starch	6%	Iron (3b103)	41 mg
Calcium	1.5%	Copper (3b405)	41 mg
Magnesium	0.3%	Zinc (3b605)	100 mg
Phosphorus	0.4%	Manganese (3b503)	100 mg
Sodium	0.2%	Iodine (3b202)	0.2 mg
		Cobalt (3b304)	0.1 mg
		Selenium (3b801)	0.4 mg

Zootechnological additives	Quantity (addition per kg)
<i>Saccharomyces cerevisiae</i> CNCM 1-4407 (4b1702)	5,2x10 ⁹ CFU

Technological additives	Quantity (addition per kg)
Propyl gallate (E310)	13,7 mg
BHT (E321)	152,7 mg
Citric acid (1a330)	7,6 mg

Sensory additives	Quantity (addition per kg)
Chestnut extract	2.9 g
