About Perfomix

Cavalor Perfomix is a sports muesli for performance horses. With flaked and puffed cereals for easy digestion and prebiotics and probiotics to support optimal gut function, the foundation for natural resistance. With essential multivitamins that supply the higher levels needed for competition horses. B-complex vitamins play a key role in energy management.

Cavalor Perfomix is a level 3 feed for horses receiving very regular and intensive training.

What makes Perfomix unique?

For active horses

Feed for horses that are trained regularly and actively.

With flaked & puffed cereals

With flaked and puffed cereals for easy digestion. Flaked cereals are much easier to digest than unprocessed cereals. Puffed cereals are even easier to digest. Puffed cereals are heat-treated, disentangling up to 90% of the starch. This makes the cereals twice as digestible compared to unprocessed cereals. Puffed cereals have many other benefits compared to unprocessed cereals, such as slower release of energy, fewer sugar peaks, lower risk of digestive problems like colic or gastric ulcers, more nutrients and energy in a smaller amount of feed, more flavour, longer gastric retention, and slower release in the small intestine.

Sport essential multi-vitamins

Vitamins can help improve performance by giving a bit of a boost. Vitamin E protects muscle cells against free radicals and supports the natural functioning of the immune system. B-complex vitamins (thiamin, riboflavin, calcium D-pantothenate, pyridoxine hydrochloride, choline chloride, niacin, cyanocobalamin, folic acid and biotin) play a key role in energy levels or contribute to improved metabolism of carbohydrates, nerve signals or the supply of oxygen to the muscles.

Advice

Feed as you need

The foundation of good nutrition for your horse is adequate roughage and access to fresh drinking water. Supplement this base with concentrates or a balancer depending on the individual nutritional needs of the horse. Use supplements to fine tune.

Feeding recommendations for Cavalor Performix

We recommend a minimum of 450 g to maximum 800 g per 100 kg body weight per day. For a 600 kg horse this means a minimum of 2,7 kg and a maximum of 4,8 kg per day. Divide the concentrate feed over several portions per day, preferably after feeding roughage.

Composition

Barley flakes (22%) / Oats / Wheat middlings / Linseed husks / Wheat bran / Puffed maize (7%) / Beet molasses / Puffed barley (3%) / Linseed / Spelt hulls / Broken oil seeds / Soya bean hulls (produced from genetically modified soya) / Rape seed meal / Wheat / Soya oil / Sunflower seed meal / Soya meal (produced from genetically modified soya) / Fructo-oligosaccharides / Calcium carbonate / Sodium chloride / Barley / Hydrated magnesium silicate / Alfalfa / Vinasse / Maize steep liquor / Maize gluten / Sodium bicarbonate

Nutritional value	Quantity
NE EWpa (CVB)	0.9 EWpa/kg
VREpa (CVB)	82 g/kg
DE (NRC)	11.39 MJ/kg
DE USA (NRC)	2.72 Mcal/kg

Analysis	Quantity
Crude protein	11.0%
Crude fat	4.5%
Crude ash	6.5%
Crude fibre	9.5%
Sugars	4.5%
Starch	31.5%
Calcium	0.8%
Magnesium	0.3%
Phosphorus	0.6%
Sodium	0.25%

Zootechnological additives	Quantity (addition per 100 kg)
Saccharomyces cerevisiae CNCM 1-4407 5 (4b1702)	2x10 ⁹ CFU

Technological additives	Quantity (addition per 100 kg)
Propionate d'ammonium (1k284)	326 mg

Sensory additives	Quantity (addition per 100 kg)
Extrait de marron	20 mg

Vitamins and trace elements	Quantity (addition per kg)
Vitamin A (3a672a)	14000 IU
Vitamin D3 (3a671)	1450 IU
Vitamin E (3a700)	470 mg
Vitamin B1 (3a821)	7 mg
Vitamin B2 (3a825i)	8 mg
Calcium D-pantothenate (3a841)	15 mg
Vitamin B6 (3a831)	1.5 mg
Vitamin B12	0.02 mg
Biotin (3a880)	0.24 mg
Choline chloride (3a890)	250 mg
Iron (3b103)	75 mg
Copper (3b405)	45 mg
Copper (3b413)	9 mg
Copper (3b409)	3.6 mg
Zinc (3b605)	130 mg
Zinc (3b607)	12 mg
Zinc (3b609)	9 mg
Manganese (3b503)	140 mg
Manganese (3b506)	18 mg
Iodine (3b202)	1.5 mg
Cobalt (3b304)	0.4 mg
Selenium (3b801)	0.4 mg
Selenium (3b815)	0.25 mg
