

Yes, bacteria on your skin!

- Every skin (equine, human, ...) has a certain microbiome
 - Millions of good micro-organisms function as a natural ecosystem
 - Healthy skin when in balance
- Harmful bacteria
 - Allergy, infection, ...
 - Microflora disturbed

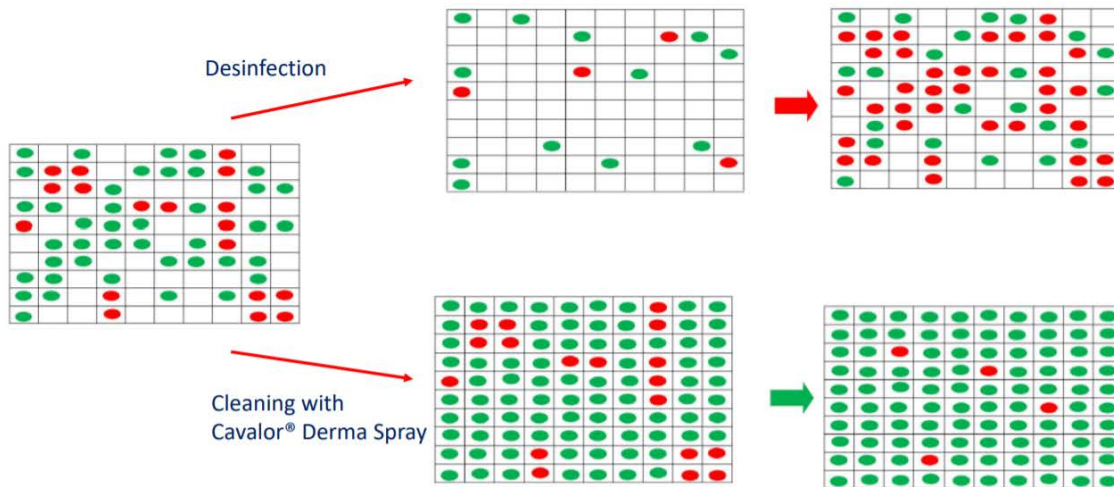

Derma Spray - an innovation in skin care

- How does it work?
 - Probiotics:
 - Living good bacteria
 - Many different species
 - Support a healthy skin
 - Prebiotics
 - 'feed' for the good bacteria
 - Support the microbiome

Let's make it practical

Derma Spray – an innovation in skin care

- When to use?
 - Bacterial infections
 - Fungal infections
 - Thrush
 - Mud fever
 - Summer eczema
 - Desinfecting wounds
 - Allergic reactions
- When not to use
 - Rubbed hair (spurs, reins, ...)
